

biomesh::fiber2D::generate_fiber

biomesh::fiber3D::generate_fiber

biomesh::seed_plane
::intersection

biomesh::vector_field
::get_grid

```
graph LR; A[biomesh::fiber2D::generate_fiber] --> D[biomesh::vector_field::get_grid]; B[biomesh::fiber3D::generate_fiber] --> D; C[biomesh::seed_plane::intersection] --> D;
```

The diagram illustrates a dependency or data flow. On the left, three separate boxes represent different functions: 'biomesh::fiber2D::generate_fiber', 'biomesh::fiber3D::generate_fiber', and 'biomesh::seed_plane::intersection'. On the right, a single, shaded box represents the function 'biomesh::vector_field::get_grid'. Three blue arrows originate from the right side of each left box and point towards the left side of the right box, indicating that each of the three functions on the left interacts with or provides input to the 'biomesh::vector_field::get_grid' function.
